

Markdown Cheat Sheet

Compact reference for CommonMark and GitHub Flavored Markdown (GFM). Free from mdtool.dev.

Text

Element	Syntax
Headings 1 to 6	<code># H1 ## H2 ... ##### H6</code>
Bold	<code>**bold**</code>
Italic	<code>*italic*</code> or <code>_italic_</code>
Bold and italic	<code>***both***</code>
Strikethrough (GFM)	<code>~~deleted~~</code>
Inline code	<code>`code`</code>
Paragraph	Leave a blank line between blocks
Line break	End the line with two spaces, or use <code>
</code>
Escape a symbol	<code>*not italic*</code>
Hidden comment	<code><!-- not rendered --></code>

Lists, links and images

Element	Syntax
Bulleted list	<code>- item</code> (indent to nest)
Numbered list	<code>1. item</code>
Task list (GFM)	<code>- [] to do</code> and <code>- [x] done</code>
Link	<code>[text](https://example.com "title")</code>
Reference link	<code>[text][id]</code> then <code>[id]: https://example.com</code>

Autolink	<https://example.com>
Heading link	[Jump](#heading-text)
Image	![alt text](image.png)
Blockquote	> quote (use >> to nest)
Horizontal rule	--- on its own line
Footnote (GitHub)	Text[^1] then [^1]: The note
Alert (GitHub)	> [!NOTE] also TIP, IMPORTANT, WARNING, CAUTION

Code blocks

Fence with three backticks and add a language for syntax highlighting:

```
```python
def hello():
 print("Hello, Markdown")
```
```

Use a mermaid language tag to draw a diagram on GitHub and in MDTool.

Tables (GFM)

```
Left	Center	Right
a	b	c
```

Colons in the separator row set alignment. Escape a pipe inside a cell as \|.
